Geographic Breakdown

By Industry

TODAY all business magazine is the only one of its kind in Iraq and as such it covers a wide industry sectors.
General trade is the largest segment of classification, part of the reason is the underdevelopment of segmentation in Iraq. Most private business deal with multiple sectors, partly because of the long history of not being able to predict future forecast for that segment and so it has always been a defensive move on the part of the private sector in Iraq.
Government is still very dominant in total GDP, for example Iraq gets over 95% of its international revenues from the oil sector which is going to expand rapidly in the coming years, therefore we devote a section to energy in Iraq.

It is our general goal as the market develops in Iraq to expand into more specific publications covering energy, logistics, security and other significant sectors that has a lot of promise for expansion in the coming years.
